CONTROL TOWER FREQUENCIES ON ANCHORAGE TERMINAL AREA CHART

Airports with control towers are indicated on the face of the chart by the letters CT followed by the primary VHF local control frequency (MHz). Information for each tower is listed in the table below. Operational hours are local time. The primary VHF and UHF local control frequencies are listed. An asterisk (\*) indicates the port-time tower frequency is intended to be a collocated full-time FSS for use as Airport Advisory Service (AAS) during hours the tower is closed. The primary VHF and UHF ground control frequencies are listed. Automatic Terminal Information Service (ATIS) frequencies shown on the face of the chart are primary or secondary VHF frequencies. All ATIS frequencies are listed in the table below. ATIS operational hours may differ from tower operational hours. AAS and/or FAS indicate Radio Instrument Approach available. "NOI" indicates Monday through Friday.
